More than half of the world population lives in cities today and it is likely to increase to 60 percent by 2030

Population living in urban areas,¹ 2015 and 2030, Percent

1 Urban population according to national definitions

Greatness is multidimensional

Environment

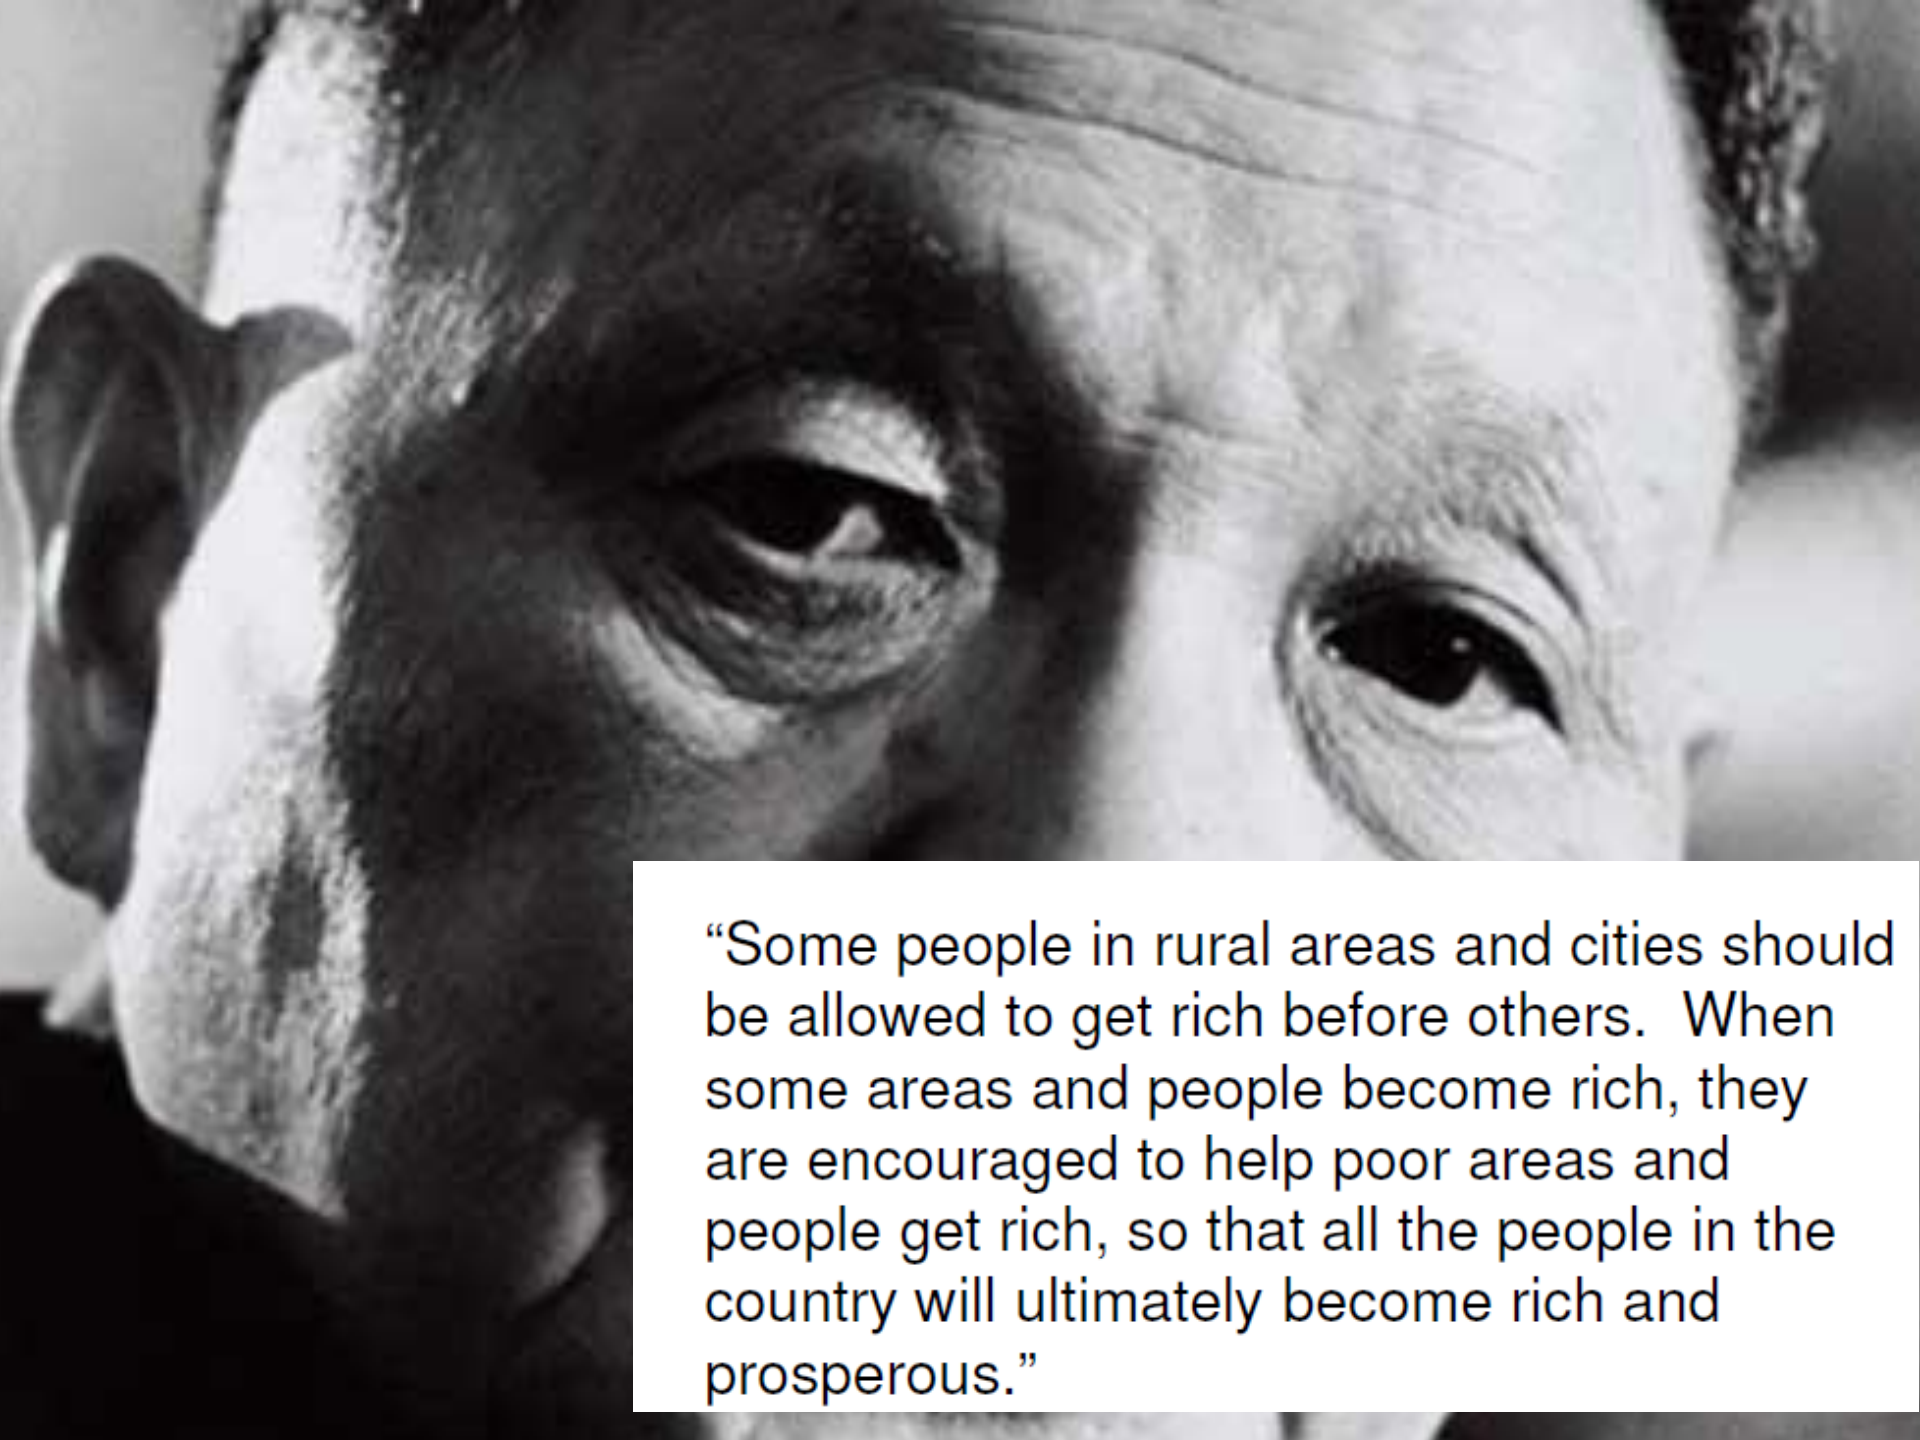

Economics

Society

“Some people in rural areas and cities should be allowed to get rich before others. When some areas and people become rich, they are encouraged to help poor areas and people get rich, so that all the people in the country will ultimately become rich and prosperous.”
